The Serendipity Generator©

You never walk alone!! And It is Christmas Every Day!

Description of what it is all about!

This presentation is about **generating** Serendipity in all fields with a **trainable** method!

This **trainable** method has 2 ingredients (1 & 3) with (2) as a results to see "something"
In (3) that you were **not** in search for. It is always something valuable *when* implemented!

Health
Safety
Innovation
Projects
Business
A Dream

Or whatever

③ The Bikini Triangle as part of The Holy Grail

② Serendipity or God's eye

The Bikini3 + BSEfficiency=Serendipity Generator

① **Blue Swan Efficiency**

To be efficient according to the Blue Swan definition you need to:
1 Have two goals (projects): one goal aimed at the world (your work) and one goal just for you (your dream).
2 Be that person who always says yes.
3 Reach your goals at the expense of nothing.

Note:
This knowledge was also a serendipity finding while I was/am in quest (1996-now) to build **The Shutdown Generator**, a Dbase/Spreadsheet software to prepare turnarounds. Target is to do it in 3 minutes. I hope I will reach that goal in 2015.

The potential value is in the Billions.

This **trainable** method to generate Serendipity will change society because it will change the way we look:

1- at each other (do not judge but listen to the info given. Use it for your 2 goals)

2- at the past (do not judge yesterday or further away but analyze the info and use it for your 2 goals)

3- at information (all is information not only Big Data. And it's everywhere)

And always in relation to your 2 Goals

This trainable serendipity is an evolution (a **logical** step for mankind) and a revolution (implementation is easy and fast via the media) with valuable impact in all fields.
